

DECREASE DUST WITH US

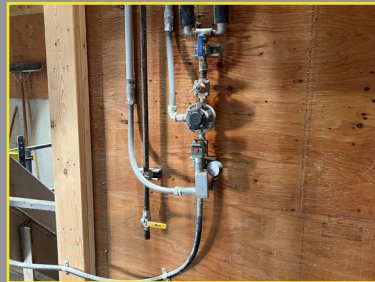

www.petersonsdustsolutions.com

Peterson's Dust Solutions

We provide Dust Solutions for Fertilizers

Our system provides an easy way to apply food-grade mineral oil onto fertilizers.

ABOUT US

In the late 1980's, R.C. Peterson became aware that there were health hazards not being addressed when it came to handling grains. He noticed this was not only a farmer's problem but a rising problem on the commercial level as well. He decided this needed to be dealt with and he created "Agri Duster."

In the early 90's Randy Peterson started working for his father R.C. Peterson in the dust suppression and electrical industries. After R.C. Peterson's passing in 2016, Randy Peterson decided to continue with his father's vision and expand into the fertilizer market.

THE BENEFITS

SAFETY

The dust reduction will significantly decrease the possibility of an explosion from sulfur fertilizer. It will also reduce dust inhalation.

REDUCED SHRINKAGE

Oiling will keep fine particles in the final weight, reducing shrinkage.

CLEANLINESS

The reduction of dust will help keep buildings cleaner, allowing a better work environment and longer equipment life.
